

Emergency Active Travel Fund - Tranche 2

Frequently Asked Questions (FAQ's)

ESCC has only received limited information so far in relation to the funding available for Tranche 2 (see below) and we will update this as more information becomes available.

1. How much funding is allocated to East Sussex County Council (ESCC)?

ESCC's indicative Tranche 2 funding allocation is £1.96m, which we have been advised will be available towards the end of the summer 2020. ESCC is awaiting further information from Department for Transport (DfT) on the application process. A potential programme of measures for this phase will be dependent on when the measures are required to be installed by the DfT.

2. What is the purpose of the second tranche of funding?

The second tranche of funding will enable authorities to install further, more permanent measures to cement walking and cycling habits, and where applicable enable the implementation of schemes identified in the draft East Sussex Local Cycling & Walking Infrastructure Plan.

3. When is ESCC likely to have to submit a bid to the Department for Transport (DfT)?

It is likely that ESCC will be required to submit an application to the DfT by August 2020.
