## **Who we are and what we do**

Adult Social Care and Health is a department of East Sussex County Council. We work with people aged 18 or over who live in East Sussex.

We aim to enable you to live as healthy and independent life as you can, for as long as you can. We look at your strengths, capabilities, wider support network and community, as well as the difficulties you're experiencing, and work with you to find solutions.

Examples of people we work with include those who:

- Want to stay living at home but are finding it difficult to cope.
- Would like to get out and about into their community but, as a result of a health condition or disability, are unable to do so.
- Need information on how to access alternative, more suitable accommodation.
- Look after someone that couldn't cope without their help.

You should also contact us if you are at risk of harm, or are concerned about someone else at risk of harm by calling 0345 60 80 191.

### **Out-of-hours (emergency) support**

If you call outside of Health and Social Care Connect's normal office hours our Emergency Duty Service will respond to any serious Adult Social Care issues that cannot wait until the next working day.

In this leaflet we will introduce you to how we can work with you, and where you can find more information. For example:

- We may be able to assist you through information, advice, and help to access community support.
- There may be short-term solutions or support that we can help you to access to prevent you having greater difficulties in the longer term.
- We may be able to provide some equipment or minor changes to your home to help to keep you safe and independent.
- If you need ongoing support, you may wish to have a social care needs assessment. This is where we look in more detail with you at your needs and strengths, to find out if you have eligible needs and what sort of social care support would help.

To confirm if you are eligible for support we use 'eligibility criteria' set by the government. To be eligible you must have care and support needs as a result of a physical impairment and / or a mental impairment and / or an illness which impact on at least two areas of your daily life and have a significant impact on your wellbeing.

**For more information on the eligibility criteria you can read our factsheet 'Who qualifies for our support'.**

- If your social care needs assessment shows that you have eligible needs, we'll also complete a financial assessment with you, to tell you what you

will need to pay. Most people pay some or all of the costs of their care.

Even if you do not have eligible social care needs, we will give you information and recommendations about your options and support that could help you.

In the next sections of this leaflet we'll describe how we can work with you in more detail.

## **How we can assist you**

### **Information and advice**

We have lots of sources of information available.

- There's a broad range of information available on our website, as well as links to other helpful websites and directories.

You can visit our website to learn more about local services and service providers, local community and voluntary organisations that could support you, and to find out how to get more involved in your community.

You can also fill in an online application for social care support, apply for a blue badge, apply for a Carers Card, register a disability, read our guide on going into or leaving hospital, and much more.

Website: [www.eastsussex.gov.uk/socialcare](http://www.eastsussex.gov.uk/socialcare)

- We produce a range of printed information leaflets. These are available on our website or you can

request any of our leaflets and factsheets from Health and Social Care Connect.

If you'd like to speak to someone you can contact our Health and Social Care Connect Advisors by email or Phone, or use the Web Chat option on our website.

Email: [HSCC@eastsussex.gov.uk](mailto:HSCC@eastsussex.gov.uk)

Phone: 0345 60 80 191.

You'll find our full contact details at the end of this leaflet.

## **Discussing your options, and short-term support**

If you're not sure what you might need or what could help we will have an initial conversation with you, usually over the phone. This will help us to understand your needs and to discuss possible options, including ways to build on your strengths, and support that might be available to maximise your independence.

For example, we can talk to you about:

- Local services.
- Organisations that can help you improve your health and wellbeing or live more independently.
- Ways to connect with your community or get support from your wider network.
- Equipment that could help you.

- If you have sight or hearing difficulties, or are deafblind, we may be able to recommend or provide equipment or other support, such as mobility training.
- Your accommodation options.
- How to access support with your finances, debt or benefits.

These are just some examples, our conversation and suggestions for support will depend on your needs and what you would like to achieve.

Depending on your needs, you may be invited to come to one of our Occupational Therapy Clinics. The clinics offer advice on managing at home and can provide some equipment and small adaptations to support you (some equipment and adaptations under £1,000 are free). The clinics can also offer advice for carers and undertake carers' assessments where appropriate.

## **Short-term support to maximise your independence**

You may be offered a period of reablement, depending on your needs. This is a short-term service that helps you get back daily living skills that you may have lost because of an accident, illness or disability. For example, support after you've come out of hospital. Reablement is provided by a number of different professionals, who work with you to help you get back your confidence and daily living skills. This could include looking at alternative ways of managing everyday tasks,

and the team will help you set goals and monitor your progress.

The support you receive can be in your own home or, if necessary, in another residential setting. We aim to be flexible in what we offer to meet your needs.

Whatever the setting, reablement is always time limited. It's normally for between two to three weeks, but occasionally slightly longer, depending on your needs and progress.

You will not be charged for the agreed period of reablement, but you may be charged for any care and support you need after this. What you will need to pay will be determined by a financial assessment.

**See our 'What you will need to pay towards the cost of your care and support' leaflet.**

## **Ongoing support**

If our initial conversations suggest that you need ongoing social care support we can complete a more detailed assessment of your needs. This assessment helps us to understand more about you, including your daily life, your strengths and your support needs, and to see if you are eligible for support from us.

To be eligible, you must meet the national eligibility criteria set by the government. This criteria enables us to ensure that the limited budget local authorities have is spent on the people who most need care and support,

and that all adults across the country have equal access to support.

**For more information you can read our factsheet ‘Who qualifies for our support’.**

Unlike NHS healthcare, social care and support is not free, and the majority of people pay some or all of the costs of their care. We will therefore also assess your finances to see what you’ll need to pay.

If you have more than £23,250 in capital and assets, you’ll be expected to pay for your care yourself. This does not include the value of your property unless you’re moving into a care home. If you need social care support and have less than £23,250 in capital and assets, we will complete a financial assessment and let you know what you need to contribute towards your care. For further information see our ‘What you will need to pay towards the cost of your care and support’ leaflet.

When you contact us we will talk to you about what will happen next and how long it is likely to take.

## **Control over your care**

From working out your care and support needs, to deciding what support you get, you’ll be able to have your say at every stage.

**For more information see our ‘Assessment, Review and Support Planning’ factsheet.**

If you are eligible for support and for us to contribute toward the cost of your care, one of the ways you can

have control is by choosing Direct Payments. Direct Payments are an agreed amount of money that we give you so that you can arrange your own care. You can use this money to organise and buy the care and support you need, for example by employing your own personal assistant, instead of us doing this for you. If you want to employ your own personal assistant we can provide support to enable you to do this legally and safely.

If you're paying for your own care and support, we can still help you find and arrange services.

## **Accommodation and Housing options**

If at any stage, whether during our initial conversation or during an assessment, you tell us you no longer feel able to remain in your own home we can talk to you about accommodation and support options.

There are a number of organisations that provide different types of housing and accommodation support. These include sheltered housing schemes, Supported Accommodation, Supported Living and Extra Care schemes (which have 24-hour on-site care staff), or residential accommodation. Your eligibility for these types of accommodation may depend on the outcome of a social care assessment.

For more information you can contact Health and Social Care Connect.

You can also find more information about paying for residential care in our leaflet 'What you will need to pay towards the cost of your care and support'.

## **More information on housing options**

- You can find more information on housing and accommodation options, including local residential and nursing homes, on our online directory East Sussex 1Space.

## **If you need support to manage your housing**

There is support available to help adults aged 16 and over (single people, couples and families) to live independently and to find, or stay in their own home. This includes services which visit people in their own home, and specialist accommodation services for young people, young parents, people with a mental health condition or a learning disability, homeless people and women needing women's refuges. ## **If you look after someone else**

You are a carer if you look after someone who wouldn't be able to manage everyday life without your help. This could be an adult relative, partner, friend or neighbour.

If you look after someone you can ask for information, advice and support to help you in this role, and there are local schemes and organisations you can access.

For example; the East Sussex Carers Card allows you to register an emergency plan and offers discounts from shops and services. You can also join local support groups, and access information, advice and training for carers.

**Care for the Carers** is a local support organisation for carers. If you want to find out more about what is available, or if you're not sure what you need:

Visit the Care for the Carers website: [cftc.org.uk](http://cftc.org.uk)

Email: [info@cftc.org.uk](mailto:info@cftc.org.uk)

Phone: 01323 738 390

Text: 07860 077300

As a carer you may be eligible for support from us in your own right. To be eligible, you must meet national eligibility criteria.

To find out if you meet the criteria, you can complete a Carers Assessment either via our website [www.eastsussex.gov.uk/socialcare](http://www.eastsussex.gov.uk/socialcare) or by contacting Health and Social Care Connect.

Email: [HSCC@eastsussex.gov.uk](mailto:HSCC@eastsussex.gov.uk)

Phone: 0345 60 80 191

For more information read our leaflet 'Do you look after someone?'.

Care for the Carers is also able to help you to complete your carers assessment.

## **Keeping people safe**

Everyone has a right to live a life free from abuse and neglect. Safeguarding adults is how people can get help to stop abuse and neglect from happening.

Adults who have care and support needs, and are unable to protect themselves because of these, may be at risk of abuse or neglect. Care and support needs may relate to a person's age, physical or learning disability, mental health needs or other illness.

Abuse and neglect can come in many different forms, including:

- Physical abuse (includes being hit, slapped, kicked, pinched or misuse of medication)
- Domestic abuse (includes any incident or patterns of incidents of controlling, coercive or threatening behaviour, violence or abuse between those aged

16 or over who are or have been intimate partners or family members)

- Psychological or emotional abuse (includes being shouted at, ridiculed, bullied, threatened or controlled by intimidation or fear)
- Neglect and acts of omission (when medical, physical and / or emotional needs are ignored)
- Financial abuse (when someone misuses or steals money or property, including scams and being pressurised into giving people money or paying for things)
- Sexual abuse (includes any sexual activity that someone does not agree to or cannot agree to)
- Organisational abuse (includes neglect and poor professional practice in a care setting such as a hospital, care home, or in a person's own home)
- Self-Neglect (when a person is unable and / or unwilling to care for themselves or allow others to do so)
- Modern Slavery (this can take many forms including but not limited to slavery, sexual exploitation, forced labour, domestic servitude)
- Discriminatory abuse (occurs when people are harassed, insulted or treated badly because of age, culture, mental health needs, disability, gender, race, sexual orientation, or religion or belief).

## **What you can do**

If a crime is in progress, in an emergency or if life is at risk, call 999. To report a crime when it is not an emergency call 101.

If you have a concern about someone else let the person know that help is available and talk to them about what they want to do.

If you suspect abuse or neglect call Health and Social Care Connect on 0345 60 80 191 at any time (calls out of HSCC opening hours will be connected to the Emergency Duty Service).

## **What will happen next?**

We will always take any report of abuse or neglect seriously, and will ensure the circumstances are looked into fully in a fair and confidential way.

We will:

- talk with the person who is at risk to find out what they want to happen in relation to the concern.
- support the person to have an advocate (someone to represent them) if they need one.
- talk to the police if a crime may have been committed.
- talk to other agencies that need to be involved.
- agree the best way of helping, including considering other types of support.
